Yunisol P

Rust stain remover

Yunisol P is mainly of phosphoric acid and compounded with special surface active agents of strong permeating and cleaning actions and it effectively clean rusty parts and rust stain on painted or enameled surfaces.

CHARACTERISTICS

- Chief ingredient : Phosphoric acid
- Density (15℃) g/cm^3 : 1.4
- Appearance : Light reddish liquid
- Reactivity : Acidic

ADVANTAGES

1. This detergent is soluble in water fully and easily to handle.
2. When it is used as a treatment agent on metal surface, it functions perfectly as rust preventive with the formation of phosphate film on metal surface.

DIRECTIONS FOR USE

1. Use this agent diluted by several times with according to the purpose.
2. To take off rust stain on painted or enameled surfaces, wipe the parts with wastes or mop soaked in the solution of this agent and wash with water afterward.
3. To remove rust on metal surface, immerse the parts into the agent, condense or solution with water several times more, or spray it on the surface, and leave it for a while (5-10minutes) and later wash with water.
4. This detergent can be used also as metal brighter on various metals (copper, iron and brass) and in this case, wet the surface with water first and wipe with soaked waste with small quantity of this agent.
   After the operation, wipe the part with dry waste.
5. Don't use Yunisol P for a aluminium, zinc and nickel.

PRECAUTIONS

1. This detergent is not ignitable and poisonous but slightly irritative. Therefore, use rubber gloves in handling.
2. If it contacts with eyes, should be washed with fresh water immediately.
3. Do not change container to avoid risk of danger.
4. If contents need to be transfered use only designated containers.
